

METAL PROCESSING INDUSTRY

Bystronic ByTrans (standard and extended), complete manufacturing, installation and programming of CNC machine, with testing

In 2003 Dam-Mont started the cooperation with the Swiss company Bystronic, one of the world leaders in the development of high-quality machines and systems for the processing of sheet metal and other flat materials.

In the following years, thanks to the continuous investment in development, Dam-Mont has tackled more complex projects. Today, in the field of machinery for the metalprocessing industry we perform:

- Production of assemblies of laser and water jet cutting machines;
- Production and installation of complete automation systems for sheet manipulation;
- Joint development and design of machines.

Thanks to the mutual partnership with the company Bystronic, Dam-Mont has equipped its facilities with modern machines for laser cutting, water jet cutting and CNC press brakes.
